

Mississippi State University is hiring

Mississippi State University (MSU) is accepting applications for a faculty member where any area of Civil & Environmental Engineering can be considered. The position can be filled by a non-tenure track Assistant/Associate/Full Professor of Practice (PARF# 509414), or by a tenure track Assistant/Associate/Full Professor (PARF# 509401). Candidates with measurable years of industry, agency, and/or faculty experience are highly preferred. The Richard A. Rula School of Civil & Environmental Engineering within the Bagley College of Engineering has multiple-ended opportunities (professorship or chair) for highly qualified candidates. The position is anticipated to be filled in August of 2026. While any area of civil or environmental engineering can be considered, measurable expertise in one or more of the following areas are of particular interest: asphalt pavement systems, buried or underground structures, concrete bridges, construction materials, structural health monitoring, and trenchless technologies. The candidate is expected to work with undergraduate and graduate students in and out of the classroom and any tenure track option is also expected to engage students in research that can be published in high quality venues.

While two jobs are posted on the MSU website we only intend to fill one position.

Successful candidates will ideally have an earned B.S. and Ph.D. in civil engineering from an institution offering ABET-accredited (or equivalent) degrees. Professional and academic experience is highly desirable. Tenure-track candidates should have a potential for sustaining a vigorous externally funded research program and a dynamic portfolio of graduate and undergraduate educational competencies. Preference will be given to candidates with a Professional Engineering license, or who are on track for such licensure.

The School offers an ABET-accredited undergraduate program in civil engineering with an option for a concentration in environmental engineering and maintains a highly ranked international graduate distance education program. Research and instruction at undergraduate and graduate levels are offered in construction & materials, environmental & water resources, geotechnical & structures, and transportation & pavements fields. More information is available at the School web site at <http://www.cee.msstate.edu/> or by contacting the search committee at search@cee.msstate.edu.

Applicants must apply online at www.jobs.msstate.edu (PARF 509401 & 509414) by completing the Personal Data Information Form and attaching a cover letter describing their background, experience and goals regarding instruction and research. Candidates must also attach a current curriculum vitae and the contact information for three professional references. Applications will begin to be reviewed on November 1, 2025, and continue until the position is filled.

Mississippi State University is an equal opportunity institution. Discrimination is prohibited in university employment, programs or activities based on race, color, ethnicity, sex, pregnancy, religion, national origin, disability, age, sexual orientation, genetic information, status as a U.S. veteran, or any other status to the extent protected by applicable law.
