

Mississippi began issuing a Professional Land Surveyor license in 1962. The first license number issued was #1000.

At the request of Professional Surveyors around the state, we are providing this list of PS license numbers with the names of the individuals to whom those numbers were issued. Once you find the number you want from this list, you may then go to our website's Roster to see if that person's license is still active.

Many of these records are old, and contain hand-written notes made by the Board staff years ago; you'll see hand-written references to the Mississippi statutes which were the basis for the licenses being issued. Many of these statute reference numbers are out of date and no longer valid.

If you have any questions about a PS license, please contact us at :
